

Armored USB cables resist up to 1500 PSI crushes and impacts

L-com, Inc. has released two new USB 2.0 cable assembly lines with metal armor around the cables. The new Type A male to Type A male and Type A male to Type B male cables boast a crush resistance of 1500 PSI (Pounds per Square Inch). The company's USB cabling offering has long included products such as latching USB cables, high flex USB cables, right angle USB cables, and waterproof USB cables. These new armored USB cables are appropriate for applications such as military/aerospace, security, medical facility, and industrial environment applications.
