

Miniature infrared temperature sensor ideal for mounting in tight spaces

Omega introduces its new series of miniature infrared temperature sensor. The OS-MINI has features such as a miniature sensing head that makes this CE compliant product ideal for mounting in tight spaces, screen color changing capabilities to indicate alarm mode, optional touch screen for temperature indication and configuration, optional high-ambient sensing head that withstands up to 180 degrees Celsius (356 degrees Fahrenheit) without cooling, adjustable emissivity setting suitable for paper, plastics, food, and painted services.
