

## **Ultra-slim Smart Touch Computer fits a variety of industrial applications**

ADLINK Technology, Inc. launched the 15.6" Smart Touch Computer BFS-15W02. With a low-power Intel Atom D2550 processor, the BFS-15W02 allows fanless operation up to 50°C while guaranteeing longevity support. Unlike conventional panel PCs, this ultra-slim Smart Touch Computer does not only look appealing, but also provides IP54 protection and outstanding reliability. Sleek, full-flat touch screen, chemical resistance and ease-of-maintenance and cleaning are just a few examples of this panel PC's superior features. Arm-mount capability and an optional customized, integrated desktop stand enable the BFS-15W02 to fit anywhere—on a working bench, on the wall or on a swing arm—and still stay connected via built-in Wi-Fi or dual Gigabit Ethernet.

### **Product design with style and reliability**

The BFS-15W02 adopts a full-flat touch screen that passes the IP54 test, with waterproof protection on the front and the top, combining data protection and convenience. An appealing appearance and compact, stylish design is achieved through flat surfaces and invisible screws. Particularly valuable features include chemical resistance and easy cleaning. Available with an integrated tilt-adjustable stand, the BFS-15W02 also supports both 100mm and 75mm VESA mounting holes.

### **Interactive interface with no boundary**

Pre-loaded Windows Embedded Standard 7 Premium and Intel Atom Processor D2550, the BFS-15W02 offers excellent performance with low power consumption. Embedded dual Ethernet and Wi-Fi allow users to access and transfer data easily.

This new product also features capacitive power and brightness buttons for a reliable and a user-friendly interface. Its fanless design allows high operation temperatures up to 50oC, providing users with a wide range of working environments. The BFS-15W02 supports VGA output for a second display to broaden its applications, and opening the back cover to upgrade the 2.5" SATA HDD/SSD is a simple task.

### **Variety of applications**

The BFS-15W02's user-friendly design makes it highly flexible and serviceable in many different kinds of installations. This simple, complete and compact system enables straightforward integration into a variety of applications, including retail stores and showrooms for advertising and content display in a range of locations, including hotels and restaurants for self check-in/out stands, interactive tourist information kiosks, as well as healthcare, physical medicine and fitness centers.
