

## Nano connector sealed to the IP67 rating

Omnetics Connector Corporation announces its latest addition to the Nano 360 family, the SureCon 360. These connectors are available in 6, 11 or 16 positions, with an IP67 rating and 3 different cable options: Military (UL94 V-O material), Medical (ISO10993 biocompatible) and standard grade.

The SureCon 360, a waterproof plastic connector, is polarized and ergonomically designed to engage and hold firmly yet disengage under a specific load to prevent damage to the equipment. The SureCon 360 is designed with a .025" pitch, weighs as little as 3.2 grams, can carry 1 ampere per contact and is sealed to the IP67 rating for water and dust ingress; making them the ideal connector for applications where size, weight and environment are concerns.
