

Network cube enclosure available in compact size

New Age Enclosures announces the release of a sleek new enclosure called “The Network Cube”. Identified as part number S-202010, the compact design measures just 2.0” in length, 2.0” in width, and 1.0” in height.

The term Network Cube was chosen as its size is an ideal fit with coaxial plugs, Ethernet interface, and as an RF interface node. Internally it accommodates a 1.80” wide x 1.80” long PCB. The enclosures are now in stock in white and black RoHS compliant ABS plastic. For customization they may be ordered in custom colors, in clear polycarbonate, with CNC modifications, and pad print decorating.
