

## **Power supplies designed to meet rugged CalTrans specifications**

ETA-USA introduces the first in its CalTrans (California Department of Transportation) Series of industrial grade power supplies designed to meet rugged CalTrans specifications. The 206L provides power for critical highway traffic signal controllers. ETA-USA's 206L meets CalTrans TEES-2009 specifications and has been tested and approved by CalTrans for their most demanding outside signaling cabinets. The California Department of Transportation specifications are used in many states as their standards for traffic signaling cabinets.

The 206L is available with 6-10 week delivery at competitive prices. Volume discounts apply.
