

AC/DC Supplies Possess High Efficiency

Offering a typical efficiency of over 90%, ROAL Electronics' SFA160 Series of AC/DC power supplies deliver 160 W of regulated DC power with standard output variants of 5, 12, 24 and 48 V. The 2" × 4" × 1" devices use an auxiliary fan output of 12 V for system stand-by control voltage or to supply voltage for an external fan. The RoHS-compliant supplies come with OVP and short term protection, over temperature protection and a universal input voltage range. Applications include DSI, WiFi and WiMax basestations as well as networking, communications, video and broadcast equipment.
