

Cases Offer Different Operating Options

Coming in heights of 1U, 2U or 3U and depths of 203, 330 and 457 mm, Hammond Electronics' RM family of aluminum rack cases operate while mounted in a 19" rack or as a desktop enclosure. The units consist of an extruded frame, removable vented or plain top and bottom covers and optional 19" rack mounting angles and self-adhesive rubber feet. The front and rear panels are removable and interchangeable with front panel handles that mount to the rack-mounting angles and optional rear-mounting brackets.
