

6-W DC/DC Converters Offer Wide Temperature Range

Suitable for local distributed power applications, Mornsun America's WRA_YMD and WRB_YMD Series 6-W DC/DC converters operate in a temperature range from -40°C to 85°C. The 1" × 1" units perform from 2:1 inputs ranging from 4.5 VDC to 72 VDC and provide regulated single and dual output voltages of 3.3 VDC, 5 VDC, 12 VDC, 15 VDC and 24 VDC. The metal-packaged devices demonstrate input-to-output isolation of 1,500 VDC, efficiency up to 86%, and short circuit protection. The converters require no external heat sink for operation. From \$8.50 in OEM quantities.
