

Waterproof LCD Handles Tough Environments

Encapsulated in an aluminum enclosure sealed to IP68/NEMA 6P specifications, Stealth's Model TT-840 LCD monitor has an 8.4" screen and is designed to survive demanding work environments. The waterproof sunlight-readable LED-backlit display has a brightness of 1,000 nits and an IR touchscreen. Power, Video and USB connections are provided through IP68 water-proof connectors directly on the unit.
