

## MCUs Include Mid-range 8-bit Core

Most Popular on ECNMag.com:

The PIC16F193X family of microcontrollers (MCUs) from Microchip is the company's first to feature their Mid-range 8-bit core. The "LF" family members feature Microchip's nanoWatt XLP technology. The family also offers a direct LCD drive and support for mTouch capacitive touch-sensing solutions. Other features include: flash program memory up to 14 KB, Data RAM up to 512 Bytes, 256 Bytes Data EEPROM, 32 MHz internal oscillator, 16-level hardware stack, 16-level hardware stack, and 1.8-V to 5.5-V operation. From \$1.24.
