

Thirty-W AC-DC Power Supplies Available with Single, Dual, Triple Outputs

MicroPower Direct introduced its MPM-30IS Series of compact, 30W switching power supplies. These encapsulated modules include a universal AC input, full safety approvals, desirable filtering and reliability. Twelve standard models operate from a universal input of 85 V to 265 VAC; providing tightly regulated single, dual and triple outputs of 5, 12, 15, 24, 48, ± 12 , ± 15 , $5/\pm 12$, $5/\pm 15$, $5/3.3/12$ or $3.3/5/12$ VDC. Standard features include filtering to EN 55022 Class B, input/output isolation of 3,000 VAC, and compliance to EN 61000-4. All models are protected for over load, over voltage and short circuit faults. The MPM-30IS has a Class II input (IEC61140). This means it can be used without an earth ground connection. The MTBF (per MIL HDBK 217F) of the MPM-30IS Series is >250 khours. All models are approved to EN 60950. The series is certified to CE and is RoHS compliant.
