

Mouser Electronics Shipping BeagleBoard.org's Newest Member of the Pack - BeagleBone

January 25, 2012 - Mouser Electronics today announced it has stock available for immediate purchase of the BeagleBoard's BeagleBone Community Development Board.

The highly sought-after BeagleBone Community Development Board delivers the bare bones with the greatest access to interface signals for sensors and controls, while eliminating the need for additional equipment with a single cable development environment. Intended to work stand alone or in conjunction with existing BeagleBoard and BeagleBoard-xM, the BeagleBone Community Development Board is targeted at application developers enabling easy access to industry standard I/O's. BeagleBone features the TI AM3359 processor, a 700MHz ARM Cortex™ -A8, 256-MB RAM, and a USB 2.0 port with the ability to supply power. BeagleBone and BeagleBoard-xM are ideal for such applications as 3D printers and industrial robotics, web servers and Internet-enabled kiosks, in-vehicle entertainment, and home media centers.
