

Behlman receives follow-on order for COTS Power Supplies used by the US Navy for airborne missions

Behlman Electronics has received an additional order for a quantity of its Model 00389 COTS power supplies for U.S. Navy's airborne anti-submarine and anti-ship surveillance and targeting systems.

Behlman's Model 00389 COTS switch mode power supply is a rugged, highly-reliable unit designed and built for military and high-end industrial applications. It is designed to meet the requirements of MIL-STD-704A and RTCA-DO160, as well as MIL-Standards 901; 810C; 167; and 461C/D. These power supplies have repeatedly proven their reliability and performance in airborne naval systems as well as on shipboard and mobile applications.

Ron Storm, Behlman's Vice President of Marketing and Sales, said, "We are proud to be able to support the US Navy's mission and do so while providing significant cost savings. By providing one of our Standard Commercial Off-the-Shelf power supplies to meet the Navy's specific military requirements, our COTS program saves tax payers the many millions of dollars required for custom designing, engineering and manufacturing."

About the Behlman 00389 COTS Power Supply

Model 00389 power supplies operate from 115/200 VAC +/-20% at 360 to 440 Hz, and provide eight DC outputs of varying power. Other features include superb specs for Load and Line Regulation; PARD-Ripple and Noise; Over-voltage Protection; Short-circuit Protection; Current Limit, extreme Operating and Storage Temperatures, high MTBF, in a very compact chassis only 12" Long x 7" Wide x
