

Omron MEMS Flow Sensor Product Training Module

This product training module offers a succinct and informative presentation of Omron's MEMS flow sensor line-up, as well as their MEMS technology.

"The main feature of the MEMS Flow Sensor is its ability to measure flow speed from 1 mm to 40 m/s, which covers the range from the fluttering of a butterfly's wings to the roar of a typhoon. At the heart of the MEMS Flow Sensor, there is a tiny sensor element. That is the MEMS Flow Sensor chip which is only 1.5 mm square.
