

Engineering Update #1: Smart TVs & Unmanned Cars

New from Electronic Component News is the very first episode of our Engineering Update newscast, brought to you by Mouser Electronics (www.mouser.com), the electronic components distributor with the widest selection of the newest products. We talk about:

- Smart TVs and unmanned cars from CES
- A pill-sized device for imaging the esophagus
- A dual-mode infrared camera
- Poindexter vs. a new analog synthesizer
- Robotic fish for data gathering
